Great map. By Langadune This is a great map. In many ways it beats google maps and the other online mappers. Shows trails and waterways that just don't show up on the satellite maps. The printing is clear and easy to read. This is a waterproof and tear resistant map (I haven't tested it but tear-proof is probably a stretch). I used a "china marker" or grease pencil to mark it up and it works great. A little isopropyl and the marking come right off. 0 of 0 people found the following review helpful.
