2 of 3 people found the following review helpful. good in generalBy frankbut not the best. Just want to comment on the sample essays in the book... I don't think ALL the essays are not of good quality. Some essays are for 2nd or 3rd level schools, even the original authors got admitted to MBA program, you cannot draw the conclusion that the sample

essays are good. I also bought another book from Paul Bodine. Sample essays are for top schools and much more helpful. 3 of 3 people found the following review helpful. Incredibly helpful for all business school applicants By Laura Boyle This book really makes the difference. It helps to see what other applicants have done to get admitted to top business school programs. By seeing the example essays, you'll find the business school application process much more approachable and you'll be inspired to write your own essay. What I really like is how there are examples from students with all kinds of backgrounds, not just those who have worked in financial industries. It seems like every kind of student can find someone to relate to. I highly recommend this book! 3 of 8 people found the following review helpful. Many MBA Applicants Get Their Admission Essays Professionally Edited By A Customer The big secret this book doesn't reveal is that many MBA program applicants get their admission essays professionally edited. That gives them a huge edge. Take a look at Craigslist someday in the write/ed/tr8 category under services. You will find dozens of professional editors offering their services to college applicants. For as little as \$50, students can hire a professional to polish their essays to perfection. Non-native English speakers, particularly, benefit from this kind of editing. Almost all graduate school students now hire pros to edit their essays. No book is going to teach a student how to craft a compelling, clever and concise essay. Students should be warned how competitive college admission essay writing has become.

Prospective MBA students will find everything they need to prepare successful admission essays in this book. Containing 50 real essays students have written to gain admission to top business schools, this guide details the strengths of each essay, the inspiration of the student who wrote it, and what makes it a winner. The essays represent a diverse group of students and include those with traditional consulting and business backgrounds, as well as those with nontraditional backgrounds in areas such as public service, the military, and culinary arts. Crucial insights are included from business school admission officers who reveal what they are looking for in applicants, and successful applicants describe what worked for them and the mistakes they made that future applicants should avoid. Also included are strategies for the entire admission process, such as how to research the type of students that each school is seeking, ace the interview, and get powerful recommendations.
