Thousands of color photos, great descriptions of the items in this book. Lots of items that you will not find in any other book. This is a very well put together book and I give the authors my highest compliments on putting this book together.The cover of the book is really super with the photos of the fantastic lights. Overall I cannot say enough about this book. This is the best book out there on antique christmas

lighting. I am hoping the authors put together yet another book on the same subject. I highly recommend this book, I am sure you will be pleased too. Very valuable tool for the collector and dealer of antique and vintage christmas lighting. Thank you. 1 of 1 people found the following review helpful. Great reference/information book By Patricia J. Kenawell I collect many different types of vintage Christmas lights and this book gave me a lot of information about the different companies that manufactured lighting and approximately what year they were made. The photographs were excellent and I take this book with me when I go to the antique shops/flea markets/yard sales that my husband and I frequent. I would highly recommend this book to any one who collects vintage lights and/or any other type of Christmas lighting! 1 of 1 people found the following review helpful. Meh By Customer First several pages were stuck together something was spilled on it

This unique collaboration between authors Cindy Chipps and Greg Olson has resulted in the largest, best, and most comprehensive study ever undertaken in the field of collectible Christmas lighting. *Collector's Encyclopedia of Electric Christmas Lighting* is a double-size volume that showcases the transition of Christmas lighting from the 1890s into the 1960s -- everything from the first hand-blown lights used by an associate of Thomas Edison right up through the heyday of the Christmas lighting industry of the 1950s, when many companies were competing for an ever-growing post-war market. Shown are the unique design graphics used on the lighting set boxes of the 1920s and 1930s. Rare and unique figural lights are displayed. A vast representation of window candelabras and door wreaths is portrayed. The transition of wall hangings from the early plaster Santa heads of the 1920s to the intricate vinylite pieces of the 1950s is shown. Bubble lights and matchless stars are portrayed in their full glory. The wonders of Christmas motion lamps and other odd and unique Christmas lighting pieces are explored. This book makes a great Christmas gift, but is also the ideal present year-round for Christmas lighting lovers everywhere. 2005 values.
