I thought it was going to be a full book, but only about 50 large pages. I listen to Claire Lerner on babies and moms radio and she gives great advice, this book really wasn't useful for me at all. And there

was not very many examples to illustrate any points they were making. 6 of 6 people found the following review helpful. Real Help for Real Parents By A Customer As a parent, I've read lots of parenting books. Most of them seem to tell you what to think and what to do, and often give advice that doesn't really fit for me or my children. But this one encourages you to think for yourself, and to really observe and understand your child, to figure out what works with him or her. I love it. Reading it is like having a chance to talk things over with someone who really knows what being a parent is like. I felt very helped by it, and very much liked the authors respectful tone. All this, and it's short, and easily readable - very important for tired, busy parents! I think this is a wonderful book is perfect for mothers and fathers who have a child up to three years old. 4 of 4 people found the following review helpful. Great resource for parents! By Sharon This is a great resource for parents! I like how it encourages you to get to know your baby as an individual so that you can know how to respond. I've noticed how different kids react so differently to the same situations...now I understand better why that's so. This book can save parents a lot of headaches in frustration over figuring out their kids.
