Leta Hong Fincher : Leftover Women: The Resurgence of Gender Inequality in China (Asian Arguments) before purchasing it in order to gage whether or not it would be worth my time, and all praised Leftover Women: The Resurgence of Gender Inequality in China (Asian Arguments):

0 of 0 people found the following review helpful. One of the best books I read in 2015
By Miao Miao
It is very rare to see such a thorough, well-researched yet readable and relatable work in today's market. I find Fincher's tone sympathetic yet not condescending. Fincher goes beyond the issue of the 'leftover women' and probes into the political, social and historical causes that are shaping the destinies of Chinese women today. One of the best books I read in 2015. Highly recommend it!
1 of 1 people found the following review helpful. Fascinating and revealing
By Christine Novak
While China is changing by the minute, this survey gives insight into the deep cultural roots that keep women second class citizens even when they hold up half the sky. Really worthwhile for anyone interested in women's history, cultural diversity, or China today.
1 of 1 people found the following review helpful. very good book on a serious problem in Contemporary CHINA
By Shanghai
very good book on a serious problem in Contemporary CHINA .provides a very pertinent insight on the ongoing changes concerning gender relations.

A century ago, Chinese feminists fighting for the emancipation of women helped spark the Republican Revolution, which overthrew the Qing empire. After China's Communist revolution of 1949, Chairman Mao famously proclaimed that "women hold up half the sky." In the early years of the People's Republic, the Communist Party sought to transform gender relations with expansive initiatives such as assigning urban women jobs in the planned economy. Yet those gains are now being eroded in China's post-socialist era. Contrary to many claims made in the mainstream media, women in China have experienced a dramatic rollback of many rights and gains relative to men. *Leftover Women* debunks the popular myth that women have fared well as a result of post-socialist China's economic reforms and breakneck growth. Laying out the structural discrimination against women in China will speak to broader problems with China's economy, politics, and development.

"Leftover Women should carry a health warning: this book will severely raise your blood pressure. Leta Hong Fincher's subject - researched through statistical analysis, sociological surveys and extensive first-hand interviewing - is the toxic vitality of sexism in China today." - *The Guardian* Book by Julia Lovell
"Leta Hong Fincher's 'Leftover Women' offers a...chilling account of the pressures on Chinese strivers...One hopes that "Leftover Women" will soon be translated into Chinese, as it is likely to resonate deeply with urban educated women. It seems the party has forgotten the Mao-era dictum: 'Women Hold Up Half the Sky'." - *New York Times* Book by Judith Shapiro
"A compelling piece of original research...Leta Hong Fincher, an American journalist-turned-academic, argues that the same party that pushed through the elevation of women's status in the 1950s is now trying to engineer their return to the kitchen." - *The Economist* Book "A powerful -- and provocative -- argument that China's female shortage, far from empowering women, has actually resulted in a situation where urban women's rights are increasingly imperiled...It's 'Backlash', China-style, on a scale Susan Faludi never envisioned, touching the lives of 650 million women, almost a fifth of all the women in the world." - *L.A. of Books*, by Mei Fong
"In this commanding book Hong Fincher argues that China's international image, celebrating the increasing education and wealth of its women, masks an alarming slide back towards deep gender inequality - and that the very education and wealth of Chinese women is being used against them...Hong Fincher pulls no punches in her excoriation of this injustice, and yet her book is accessible and fascinating - an important work for scholars as well as those wishing to broaden their understanding." - *Feminist and Women's Studies Association (UK Ireland)* Book by Carina Hart
From the Author
Li Fang is relieved that she found a husband just in the nick of time. The parents of the university graduate and former human resources manager in Beijing feared that their only daughter was getting old and might never be able to marry. Li worried that she would pass the 'best child-bearing age' and might no longer be able to give birth. She is 26.
