Robert D. Stueart, Barbara B. Moran : Library and Information Center Management, 7th Edition (Library and Information Science Text) before purchasing it in order to gage whether or not it would be worth my time, and all praised Library and Information Center Management, 7th Edition (Library and Information Science Text):

1 of 1 people found the following review helpful. A whole chapter is missing, several chapters are printed twice. By miss abby libraryI purchased this title for a graduate MLIS course. Unfortunately for me, mine seems to be the only

copy in the world that is defective. The text runs fine until page 300, where it abruptly skips all of chapter 13, jumping to page 333. Then it runs along fine again until page 364 where it again jumps back to page 333. From then on out, it's fine, but the entirety of chapter 13 and the beginning portion of chapter 14 are completely missing. I've contacted the publisher for their assistance and will update when I hear back from them on how they plan to rectify this situation.0 of 0 people found the following review helpful. Good deal.By C. LauEverything went well and the book is clean as stated. Good deal.0 of 0 people found the following review helpful. Library School TextbookBy Beth V. HawkeyI purchased this book as it was required as the textbook for a library science course. I'm still in the class, (in other words, I haven't finished the book yet). But so far I find this book very readable and more current than some of the other textbooks we've used. I like the fact that we can access the accompanying website that goes with this book. It includes some more practical examples of management issues, which are interesting to consider and discuss.

The latest edition of this management classic sports a fresh new look to complement its updated content. It continues to cover all of the important functions involved in library management and development. New chapters on marketing, team building and ethics have been added; thought provoking mini-cases and other activities introduced or expanded; and more international materials referenced than ever before. A perennial favorite in the classroom, an invaluable reference source for information managers everywhere.

"The seventh edition of this management classic has been thoroughly updated, with new chapters on marketing, team building, and ethics, and covers all the essential functions involved in library management. New theories, concepts, and practices currently being developed and used are included. For examples, the virtual library, changing demographics, and customer needs and expectations all demand a reexamination of staff, acquisitions, and technology. Case studies, role-playing situations, What Do You Think? exercises, and action mazes complement and emphasize the principles discussed. The companion Web site provides more case studies; the Budget Case Studies section is particularly valuable. Additionally, each chapter is introduced by a minicase or overview of the principle being discussed. Both novices and veteran managers will find this to be a valuable tool." - Booklist"Enlarged and redesigned, the textbook discusses management best practices and their implementation in libraries. New chapters discuss marketing, team building, and ethics. A companion website expands on the many case studies, examples, and exercises found in the book." - American Libraries"Very readable, this text combines the seminal literature of management with current applications in contemporary libraries. It is useful not only as a textbook for library school students, but also as a handbook for middle and even senior-level library managers." - TechnicalitiesAbout the AuthorRobert D. Stueart is International Consultant on Strategic Planning for Information Services and for Educational Program Development in Information Management. He is Dean and Professor Emeritus, Graduate School of Library and Information Science, Simmons College. He has received ALA's Melvil Dewey Medal, the OCLC-Humphrey's Award for International Librarianship, and the Beta Phi Mu Award.Barbara B.
