Caleb E. Finch : Longevity, Senescence, and the Genome (The John D. and Catherine T. MacArthur Foundation Series on Mental Health and De) before purchasing it in order to gage whether or not it would be worth my time, and all praised Longevity, Senescence, and the Genome (The John D. and Catherine T. MacArthur Foundation Series on Mental Health and De):

Featuring extensive references, updated for this paperback edition, Longevity, Senescence, and the Genome constitutes a landmark contribution to biomedicine and the evolutionary biology of aging.To enhance gerontology's focus on human age-related dysfunctions, Caleb E. Finch provides a comparative review of all the phyla of organisms, broadening gerontology to intersect with behavioral, developmental, evolutionary, and molecular biology. By comparing species that have different developmental and life spans, Finch proposes an original typology of senescence

from rapid to gradual to negligible, and he provides the first multiphyletic calculations of mortality rate constants.
