**Margaret Price : Mad at School: Rhetorics of Mental Disability and Academic Life (Corporealities: Discourses Of Disability)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Mad at School: Rhetorics of Mental Disability and Academic Life (Corporealities: Discourses Of Disability):

7 of 7 people found the following review helpful. Insightful, compassionate, and practicalBy GabrielYou should read

this book if you want:--highly practical suggestions about how to teach in a way that will be more accessible and effective for students with a wide variety of disabilities, learning styles, and personalities;--insightful analysis that will inspire you to question fundamental assumptions in academia, whatever your field;--compassionate anecdotes about students, teachers, and scholars navigating ableism and mental disability in higher education; or--critical perspectives on the scapegoating of mental disability for violence. That's not to say that those are the only the things that this book offers, but they are some of the parts of it that I have found particularly helpful, brilliant, and moving. 6 of 6 people found the following review helpful. a must-read By Rebecca Day This book is beautifully written, which is rare for an academic book. It is interesting, well-researched and thoughtful. It is also thought-provoking. I recommend this book to everyone, not just disability scholars or academics.

"A very important study that will appeal to a disability studies audience as well as scholars in social movements, social justice, critical pedagogy, literacy education, professional development for disability and learning specialists in access centers and student counseling centers, as well as the broader domains of sociology and education."---Melanie Panitch, Ryerson University "Ableism is alive and well in higher education. We do not know how to abandon the myth of the 'pure (ivory) tower that props up and is propped up by ableist ideology.' . . . Mad at School is thoroughly researched and pathbreaking. . . . The author's presentation of her own experience with mental illness is woven throughout the text with candor and eloquence."---Linda Ware, State University of New York at Geneseo Mad at School explores the contested boundaries between disability, illness, and mental illness in the setting of U.S. higher education. Much of the research and teaching within disability studies assumes a disabled body but a rational and energetic (an "agile") mind. In Mad at School, scholar and disabilities activist Margaret Price asks: How might our education practices change if we understood disability to incorporate the disabled mind? Mental disability (more often called "mental illness") is a topic of fast-growing interest in all spheres of American culture, including popular, governmental, aesthetic, and academic. Mad at School is a close study of the ways that mental disabilities impact academic culture. Investigating spaces including classrooms, faculty meeting rooms, and job searches, Price challenges her readers to reconsider long-held values of academic life, including productivity, participation, security, and independence. Ultimately, she argues that academic discourse both produces and is produced by a tacitly privileged "able mind," and that U.S. higher education would benefit from practices that create a more accessible academic world. Mad at School is the first book to use a disability-studies perspective to focus on the ways that mental disabilities impact academic culture at institutions of higher education. Individual chapters examine the language used to denote mental disability; the role of "participation" and "presence" in student learning; the role of "collegiality" in faculty work; the controversy over "security" and free speech that has arisen in the wake of recent school shootings; and the marginalized status of independent scholars with mental disabilities. Margaret Price is Associate Professor of English at Spelman College.
