**Charles N. Li, Sandra A. Thompson : Mandarin Chinese: A Functional Reference Grammar** before purchasing it in order to gage whether or not it would be worth my time, and all praised Mandarin Chinese: A Functional Reference Grammar:

0 of 0 people found the following review helpful. Best reference out thereBy CustomerThe authority in the field, best there is for grammar and syntax.0 of 0 people found the following review helpful. lots of insights, but needs updatingBy dhydavidthis is a standard grammar book. although many of the points made in the book have been challenged, the insights made by the authors are still quite enlightening. it would be nice to have a completely updated

edition of it though. 0 of 0 people found the following review helpful. packaging problem  
By Ven  
The book is actually brand new. But the problem with the very thin paper packaging caused the top corner of the book to get squished and wavy. A bit disappointed. The other book that I ordered came in a good box, well-protected and not a bit scratched. The store should take care of the book packaging carefully.

This reference grammar provides, for the first time, a description of the grammar of Mandarin Chinese, the official spoken language of China and Taiwan, in functional terms, focusing on the role and meanings of word-level and sentence-level structures in actual conversations.

"Li and Thompson's book . . . is clearly ordered and convenient to consult."--*Journal of the American Oriental Society*  
About the Author  
Charles N. Li is Professor of Linguistics and Chairperson, Linguistics Department, University of California, Santa Barbara. Sandra A. Thompson is Professor of Linguistics, University of California, Santa Barbara.
