Paul Burkett : Marx and Nature: A Red and Green Perspective before purchasing it in order to gauge whether or not it would be worth my time, and all praised Marx and Nature: A Red and Green Perspective:

0 of 2 people found the following review helpful. role of in contemporary culture By Guillermo Castro Herrera playing a very important role for the development of the debate on the environmental crisis, by providing easy, friendly access to documents like this.

Though infrequently viewed as an environmental thinker, Karl Marx insisted that production as a social and material

process is shaped and constrained by both historically developed relations among producers and natural conditions. Paul Burkett shows that it is Marx's overriding concern with human emancipation that impels him to approach nature from the standpoint of materialist history, sociology, and critical political economy. Paul Burkett, PhD, who earned his doctorate in economics from Syracuse University, is a professor of economics at Indiana State University, Terre Haute. His publications include *Marxism and Ecological Economics* and many articles in scholarly journals. John Bellamy Foster is a professor of sociology at the University of Oregon and also editor of *Monthly Review*.

"This is an extraordinarily important book..."--Alfredo Saad-Filho, of *Political Economy*
