From Patrice Flynn : Measuring the Impact of the Nonprofit Sector (Nonprofit and Civil Society Studies)
before purchasing it in order to gage whether or not it would be worth my time, and all praised Measuring the Impact

of the Nonprofit Sector (Nonprofit and Civil Society Studies):

One of the major tasks facing researchers, practitioners, and funders is the development of empirical tools to measure the inherent worth of nonprofit organizations as well as the sector as a whole. Renowned scholars present chapters on the state of the art of performance measurement in the nonprofit sector and seek to establish a framework for a long-term research agenda to identify, quantify, and self-assess those qualities that make the nonprofit sector unique.

From the reviews: "The contributors to the volume engage themselves with basic issues of measurement such as availability and analysis of data, extant knowledge and methods, methodological and empirical possibilities, directions for future research, and the several difficulties intrinsic to this enterprise. ??? The essays ??? are informative, argumentative, and suggestive of the future directions of research. This is a timely and pioneering volume that offers many creative insights into the problem of measurement. It will be of considerable interest and use to academics, practitioners, and policymakers." (G. Senthil Kumar, *Voluntas*, 2004) From the reviews: "The contributors to the volume engage themselves with basic issues of measurement such as availability and analysis of data, extant knowledge and methods, methodological and empirical possibilities, directions for future research, and the several difficulties intrinsic to this enterprise. a] The essays a] are informative, argumentative, and suggestive of the future directions of research.
