From Springer Publishing Company : Medical Aspects of Disability for the Rehabilitation Professionals, Fifth Edition before purchasing it in order to gage whether or not it would be worth my time, and all praised Medical Aspects of Disability for the Rehabilitation Professionals, Fifth Edition:

The fifth edition of this landmark volume has been substantially updated and expanded to encompass an abundance of innovative rehabilitation research supported by changing technology and new research methodologies. Written for rehabilitation practitioners, researchers, and students, it distills crucial new information regarding aspects of disability pertaining to medical conditions commonly encountered in rehabilitation settings. The fifth edition addresses new

topics at the forefront of medical rehabilitation and disability from clinical, functional, and psychological perspectives, including traumatic brain injury, stroke and spinal cord injury, limb deficiency, organ transplantation, geriatric rehabilitation, and new and technology-based rehabilitation research. The book delivers new findings about social work in physical medicine, complementary and alternative treatments, trends in treatment delivery and payment systems, relevant legislation, and telerehabilitation. New chapter authors--noted authorities in their fields--address rheumatic diseases, stroke, rehabilitation nursing, research directions, and integrative medicine, among other topics. The text continues to be the only guide to medical aspects of disability for nonphysician rehabilitation professionals and other health care providers outside of rehabilitation medicine. It serves as a comprehensive guide on what to expect and how to manage each medical issue, causative agents, classification, pain management, psychological factors, and more. New to the Fifth Edition: Updated coverage of rheumatic diseases, stroke, rehabilitation nursing, research directions, and integrative medicine New information about traumatic brain injury, limb deficiency, organ transplantation, geriatric rehabilitation, and technology-based research Innovations in delivery and payment systems, accreditation, opportunities and challenges for quality, and outcome assessments New findings regarding social work in physical medicine, complementary and alternative medicine, relevant legislation, and telerehabilitation Updates on speech, language, hearing, and swallowing disorders New coverage of neuromuscular, musculoskeletal, and pediatric disorders Key Features: Delivers key information critical to the study of disability including functional status, prognosis, psychology, and vocational issues Discusses how changes in health care regulations have impacted rehabilitation medicine delivery Analyzes the convergence of emerging technologies and clinical practice Includes the contributions of distinguished practitioners, researchers, and educators Provides an Instructor's Manual with PowerPoint

About the Author Alex Moroz, MD, is associate professor, Department of Rehabilitation Medicine, New York University School of Medicine, and was an editor and contributing author to the fourth edition of *Medical Aspects of Disability for the Rehabilitation Professional*. He continues to build an impressive journal article publication resume (more than 40 articles); has received multiple grants including the Hartford Foundation, American Geriatrics Society grant to develop a geriatrics curriculum for physical medicine and rehabilitation residents; and is a four-time Teaching Excellence Award winner (2001, 2008, 2011, 2015) from the graduating resident class. Steven R. Flanagan, MD, is the chairman, Department of Rehabilitation Medicine, New York University School of Medicine, and medical director, Rusk Rehabilitation, New York University--Langone Medical Center. Dr. Flanagan is widely published with over 50 journal articles and book chapters and has researched the impact and treatment of brain injury. He is a frequent guest in multimedia venues and has lectured both nationally and internationally on topics related to brain injury and rehabilitation. Herb Zaretsky, PhD, is currently clinical professor of Rehabilitation Medicine at the New York University School of Medicine and has also served for many years as the administrator, Department of Rehabilitation Medicine, Rusk Institute, New York University--Langone Medical Center. He received his PhD from Adelphi University. He has published extensively in the field of rehabilitation in such areas as psychological aspects of disability, geriatric rehabilitation, learning and conditioning with the neurologically impaired and spinal cord injured, rehabilitation psychology and long-term care of the chronically ill, chronic pain management, and behavioral medicine applications in rehabilitation. Dr. Zaretsky is a fellow of the American Psychological Association (APA), past president of APA's Division of Rehabilitation Psychology, and recipient of APA's Distinguished Contributions to Rehabilitation Psychology Award. He is a long-serving member of the board of directors of the national and international Commission on Accreditation of Rehabilitation Facilities (CARF) and currently is chair of the CARF board. Dr. Zaretsky was also formerly president of the board of directors of the American Cancer Society's (ACS) Eastern Division (New York and New Jersey) and the recipient of the St. George Medal, a national award from ACS in recognition of outstanding contributions to the control of cancer.
