I've bought this book to help in my college studies and I think it accomplishes that.0 of 1 people found the following review helpful. schoolBy dliburdI'm currently using this book for school, and although the material is a bit useful it is not the easiest to actually understand. I am getting reinforcement through my teacher, but without him I wouldn't have much interest in the books flow. I guess not the strongest book to use for teaching a second language.5 of 5 people found the following review helpful. Methodology in Language Teaching edited by Jack C. Richards Willy A. RenandyaBy Dr. Solaiman AliAs a long-time English teacher teaching English as a Foreign Language, I have used several methodology

textbooks. I have long been looking for one book that answers some of my persisting pedagogical questions. I have found answers to those questions in the succinct articles of this anthology. In particular, I have found the following sections immensely useful and refreshing to read: section 1 (Approaches to Teaching); section 5 (Task and Project Work); section 13 (Teaching Writing); section 15 (Technologies in the Classroom); and section 16 (Professional Development). I use this book as a source to inform my current teaching of Technical Communication and other writing courses, and professional growth and development. M. This collection provides an overview of current approaches, issues, and practices in the teaching of English to speakers of other languages. This book provides an overview of current approaches, issues, and practices in the teaching of English to speakers of other languages. The anthology offers a comprehensive overview to the teaching of English and illustrates the complexity underlying many of the practical planning and instructional activities it involves. Organized into 16 sections, the book contains 41 seminal articles by well-known teacher trainers and researchers. Also included are two sets of discussion questions - a pre-reading background set and a post-reading reflection set. This anthology serves as an important resource for teachers wishing to design a basic course in methodology.
